

SERVICE MANUAL

ORIGINAL MANUAL ISSUE DATE: 2023.10

DISCLAIMER: USE AT OWN RISK. SONY AND ITS AFFILIATES ARE NOT LIABLE FOR ANY DAMAGE OR INJURY CAUSED TO ANY DIGITAL ELECTRONIC EQUIPMENT, PERSON, OR PROPERTY, WHICH OCCURS DUE TO USE OF THE TOOLS, PARTS, DOCUMENTATION, OR OTHER MATERIALS HEREIN PROVIDED, WHETHER FOR REPAIR, DIAGNOSIS, MAINTENANCE, MODIFICATION, OR OTHERWISE, INCLUDING BUT NOT LIMITED TO: ANY INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES; ANY LOSS OF DATA, PRIVACY OR PROFITS; OR ANY INABILITY TO USE, OR REDUCED FUNCTIONALITY OF, THE DIGITAL ELECTRONIC EQUIPMENT. PLEASE READ ALL INSTRUCTIONS IN THIS MANUAL BEFORE PROCEEDING. PLEASE FOLLOW ALL STEPS IN THE ORDER IN WHICH THEY ARE DESCRIBED. IF YOU DO NOT HAVE ALL TOOLS AND PARTS AVAILABLE TO YOU, OR ARE NOT COMFORTABLE PERFORMING THE REPAIRS DESCRIBED HEREIN, DO NOT PROCEED. FAILURE TO FOLLOW THESE INSTRUCTIONS, OR USE THE PROPER TOOLS AND PARTS, MAY DAMAGE YOUR PRODUCT, LEAD TO PERSONAL INJURY OR CAUSE PROPERTY DAMAGE.

WARNINGS AND CAUTIONS

CAUTION

These servicing instructions are for use by qualified service personnel only.

To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

WARNING!!

An isolation transformer should be used during any service to avoid possible shock hazard, because of live chassis.

The chassis of this receiver is directly connected to the ac power line.

CARRYING THE TV

Be sure to follow these guidelines to protect your property and avoid causing serious injury.

- Carry the TV with an adequate number of people; larger size TVs require two or more people.
- Correct hand placement while carrying the TV is very important for safety and to avoid damages.

SAFETY-RELATED COMPONENT WARNING!!

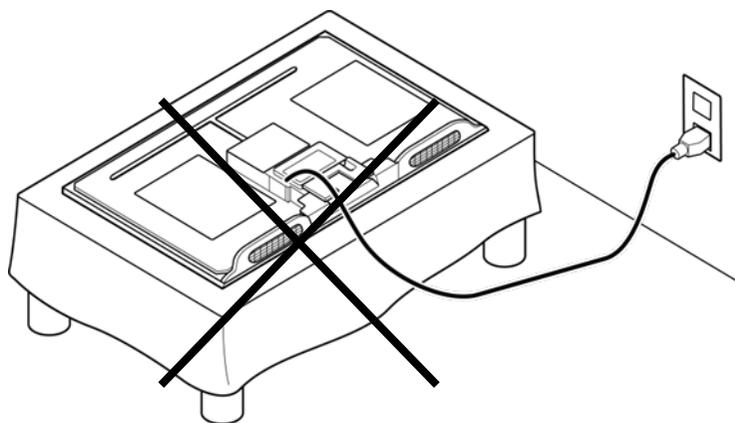

Components identified by shading and ! mark on the schematic diagrams, exploded views, and in the parts list are critical for safe operation. Replace these components with Sony parts whose part numbers appear as shown in this manual or in supplements published by Sony. Circuit adjustments that are critical for safe operation are identified in this manual. Follow these procedures whenever critical components are replaced or improper operation is suspected.

USE CAUTION WHEN HANDLING THE LCD PANEL

When repairing the LCD panel, be sure you are grounded by using a wrist band.

When repairing the LCD panel on the wall, the LCD panel must be secured using the 4 mounting holes on the rear cover.

- 1) Do not press on the panel or frame edge to avoid the risk of electric shock.
- 2) Do not scratch or press on the panel with any sharp objects.
- 3) Do not leave the module in high temperatures or in areas of high humidity for an extended period of time.
- 4) Do not expose the LCD panel to direct sunlight.
- 5) Avoid contact with water. It may cause a short circuit within the module.
- 6) Disconnect the AC power when replacing the backlight (CCFL) or inverter circuit. (High voltage occurs at the inverter circuit at 650Vrms.)
- 7) Always clean the LCD panel with a soft cloth material.
- 8) Use care when handling the wires or connectors of the inverter circuit. Damaging the wires may cause a short.
- 9) Protect the panel from ESD to avoid damaging the electronic circuit (C-MOS).
- 10) It is recommended not to exceed 1 hour of Power-On nor Burn-in period with LCD panel face down condition, in repair activity.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the internal wiring to ensure that no wires are “pinched” or touching high-wattage resistors.
3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
6. Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
7. Check the antenna terminals, metal trim, “metallized” knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.
8. For safety reasons, repairing the Power board and/or Inverter board is prohibited.

Leakage Test

(To protect electric shock when customer touch the terminal.)

Leakage current can be measured by V: Voltmeter or oscilloscope (r.m.s. or peak reading)

Stabilized power supply instrument and isolated voltage transformer: Use too much current capacity and isolated voltage transformer does not need to use stabilized power supply equipment.

Specification of RMS volt meter: Input resistance > 1 M ohm, Input capacitance < 200 pF, Frequency range: 15 Hz – 1MHz (Refer Figure A). Isolated type volt -meter (FLUKE 8921A etc *1)

*1 Not use FLUKE 8920A that connected to protective earth by diode

Leakage current of measurement instrument is less than 10 μ Arms when under test equipment AC plug is opened # Set up the following condition and turn on the set.

Applied voltage: Nominal input voltage (Description on Nameplate) # Measure the leakage current between one phase conductor and neutral for terminal A and terminal B.

Read rms value, and then calculate to peak value PEAK VALUE = $\sqrt{2}$ RMS VALUE

Comply with the following requirement Class II equipment (2-pin plug): for each terminal, the worst value of measurement must not exceed AC 350 μ A peak). Note: including AC adaptor, AC adaptor/DC operated unit combination

How to Find a Good Earth Ground

A cold-water pipe is a guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground.

If the retaining screw is to be used as your earth ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms.

If a cold-water pipe is not accessible, connect a 60- to 100-watt trouble- light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side on the line; the lamp should light at normal brilliance if the screw is at ground potential (see Figure B).

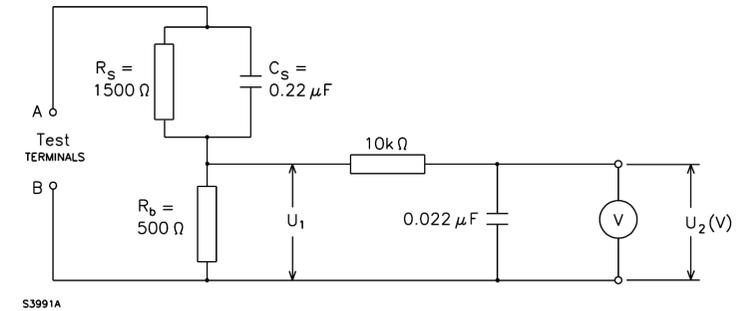

Figure A. Measuring network for Leakage Current

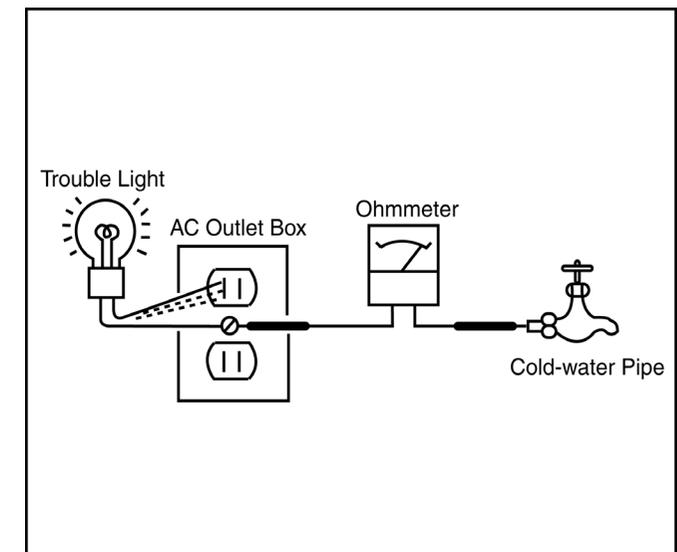

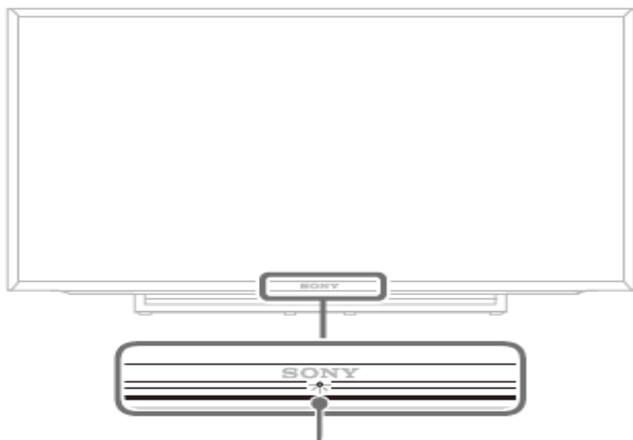

Figure B. Checking for earth ground.

SELF DIAGNOSIS FUNCTION

Status	LED Color	Remarks
Power Off (AC Off and *1)	OFF	*1 power switch off (by Side Key)
Power On	White	
Standby (by remote control off and Side Key off)	OFF	
Picture Off	White	
Failure	Red Blinking	The number of LED blinking indicates cause of failure.
Panel ID mismatch	White / Red Blinking	Blinking:0.5sec White/ 0.5sec Red
Software Updating	White Blinking	
Software Updating failure	White → Red → White Blinking	White: 1sec On / 1sec Off / 1sec On Red : 1sec Off / 1sec On / 1sec Off OSD message will be shown to inform that the update failed and then TV reboots

FAILURE Diagnosis LED Display

Error Item	Number of LED flashing	Description	Error Log String
MAIN_POWER	2	Main power rail monitoring (12V)	Main Power Err
AUD_ERR	3	Audio amp error detection	Audio Amp Err
PANEL_ID_ERR	5	Panel ID read failure	Panel ID Err
BACKLIGHT	6	Backlight error detection.	Backlight Err

[Note]

Please be caution when checking failure board (*if Power ON condition*) due to power is still supplied continuous when error is triggered.

SEC 1. DISASSEMBLY AND PARTS LIST

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

The components identified by shading and mark \triangle are critical for safety. Replace only with part number specified.

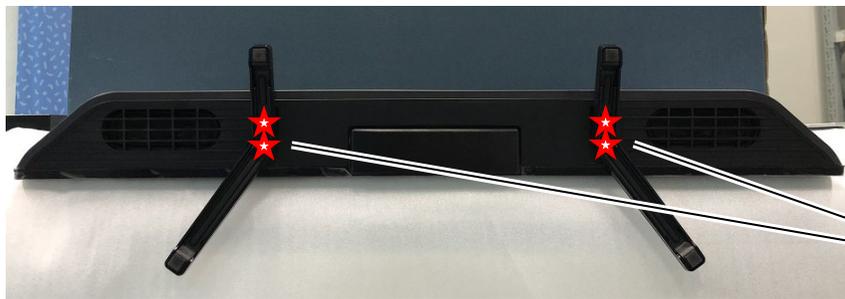

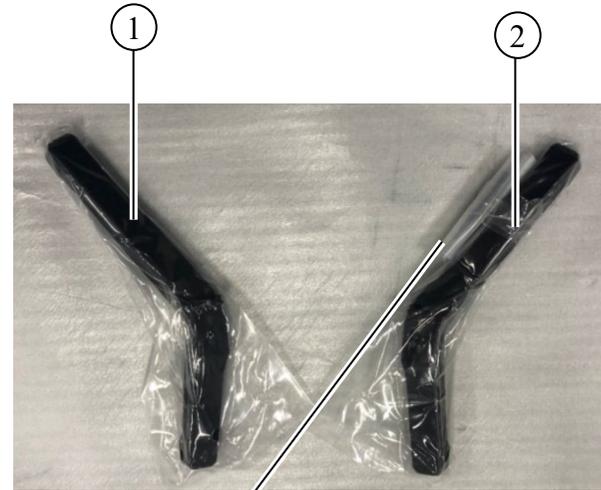

The components identified by mark \square contain confidential information. Strictly follow the instructions whenever the components are repaired and/or replaced.

1-5. DISASSEMBLY OF REAR COVER AND SERVICE POSITION

1-5-1. KD-32W830K

1). LAY DOWN THE SET IN A FLAT TABLE

Make sure no mess things under the front set.

2). UNLOCK SCREWS

	DESCRIPTION	Qty
○	SCREW, +PSW M3X8, W8, BLK	5 PCS
□	SCREW +BVTP 3X8 TYPE2 IT-3	2 PCS
●	SCREW, P M3X6	1 PCS
▲	SCREW, +BVTP 4X12 TYPE2 IT-3	5 PCS

3). REMOVE THE REAR COVER

1. Push both side of the front bezel corner area (show as the picture) and the hook- opening voice can be heard .

2. Pull up the rear cover as picture.

3. Push the rear cover as picture shown to release the hooks. (Be careful the keypad FFC wire)

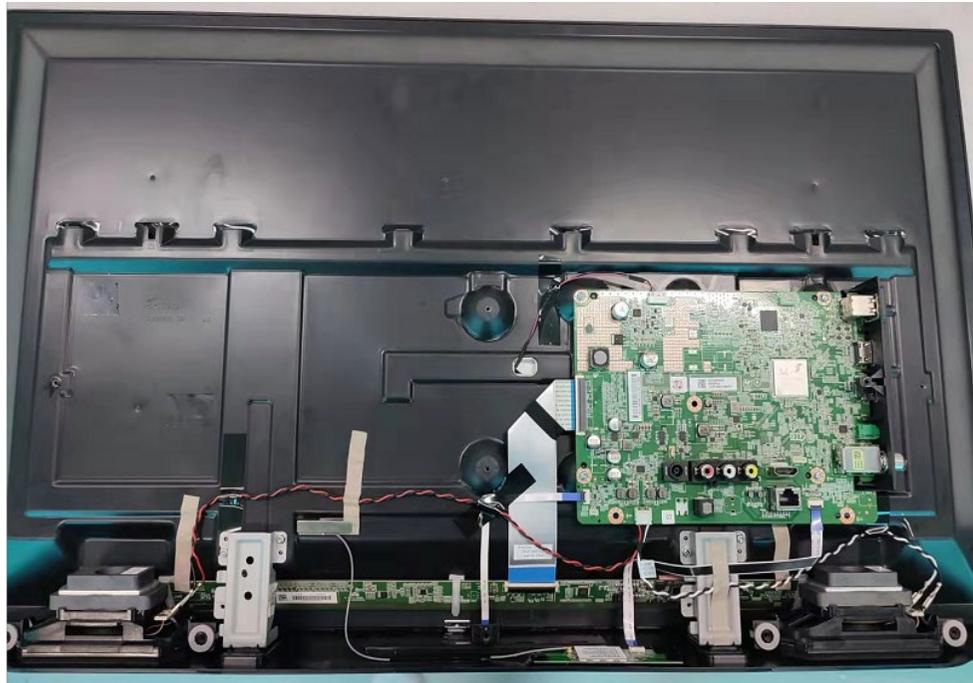

4. Flip up the rear cover as picture, remove keypad FFC wire.

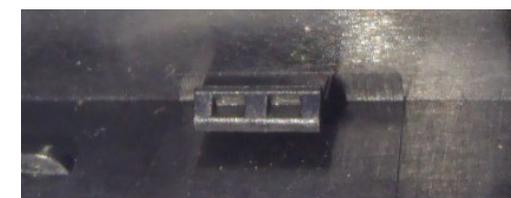

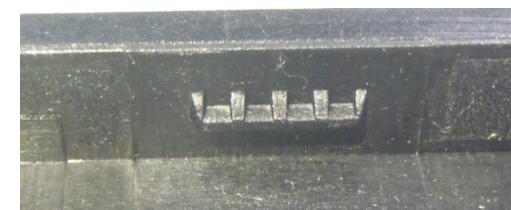

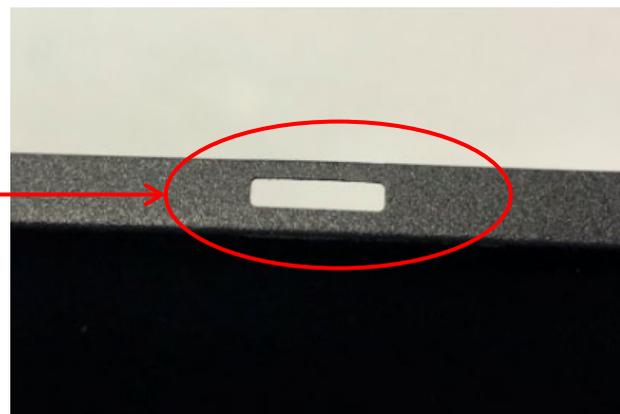

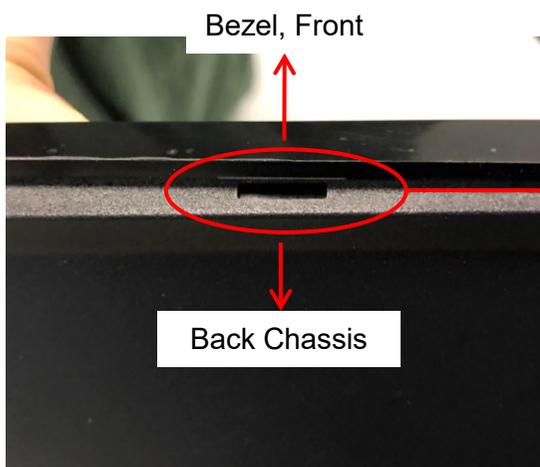

5. The end.

4). SET UP THE SET

1-6. DISASSEMBLY OF LCM AND SERVICE POSITION

1-6-1. KD-32W830K

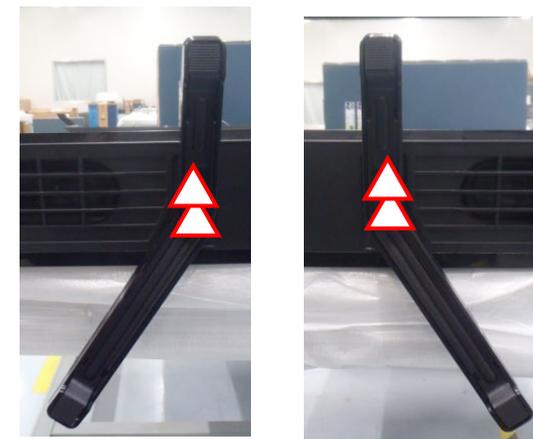

1). REMOVE THE STAND

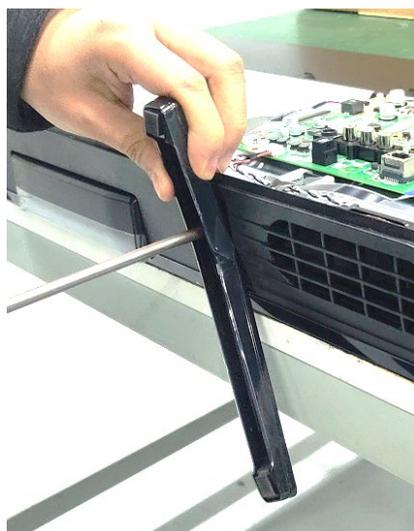

1. Lay down the set.

2. The Stand screws

△ SCREW, +PSW M4X16 4PCS

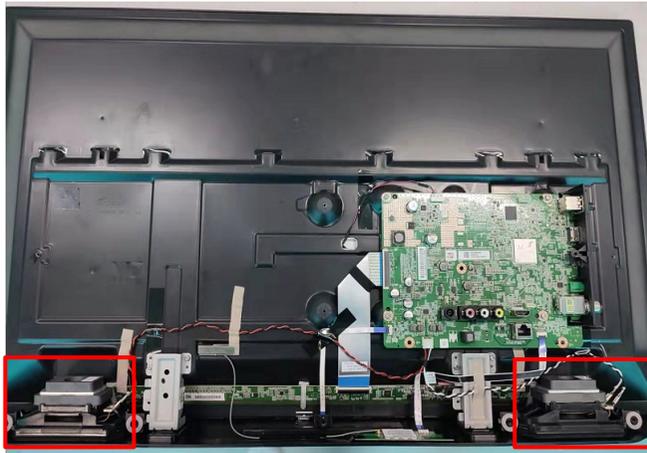

3. Hold the Stand while unscrewing

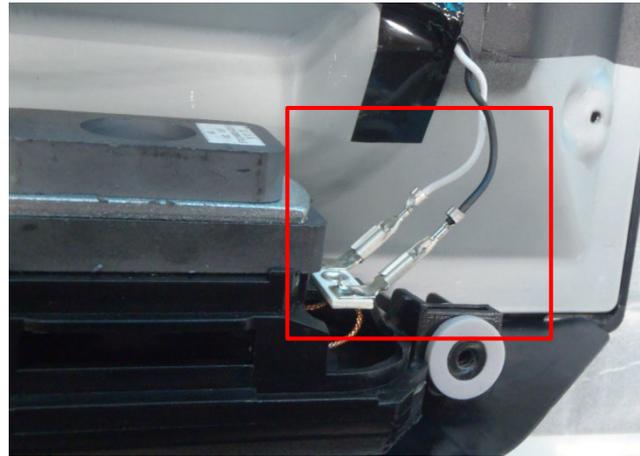

4. Take off the Stand

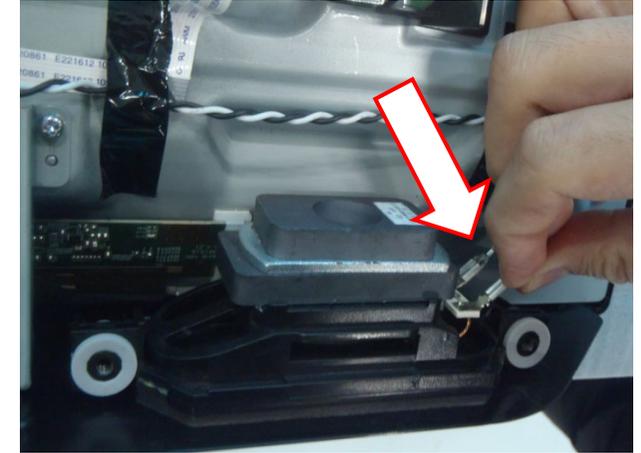

2). REMOVE THE SPEAKERS.

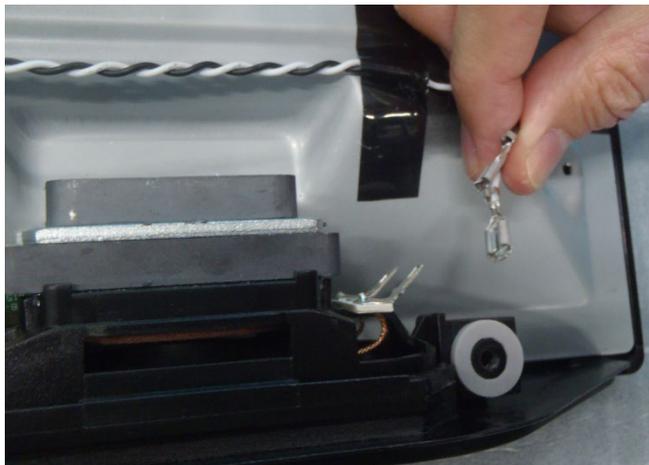

1. Speakers position

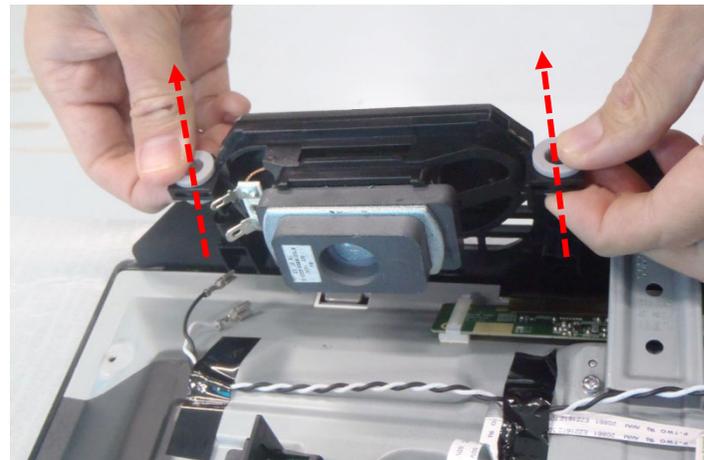

2. Speaker wire connector position

3. Push the button to release the connector

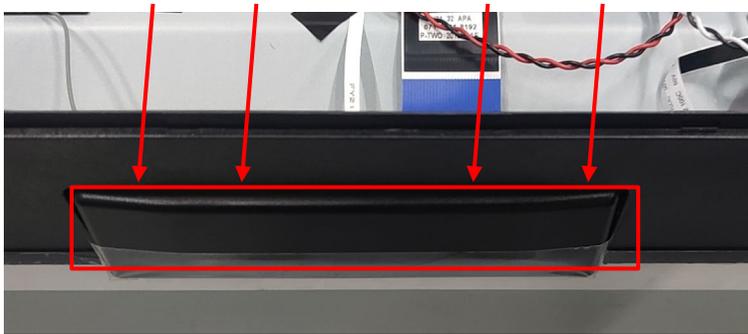

4. Release the speaker wire

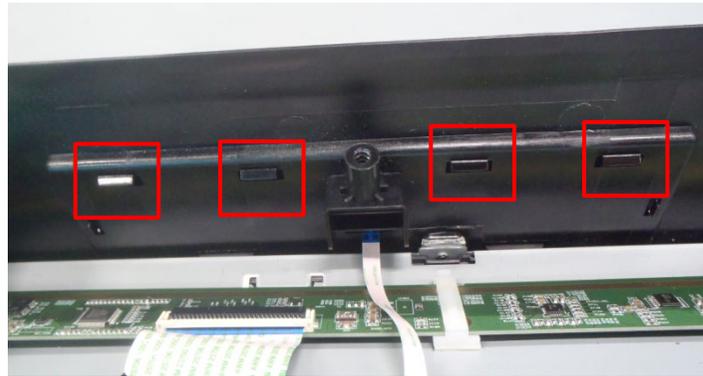

5. Remove the speakers

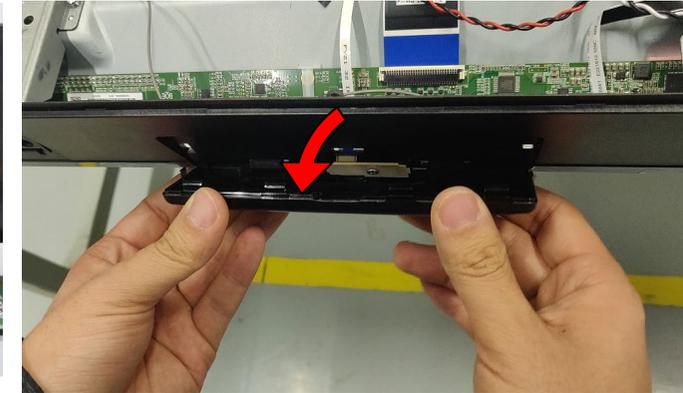

3). REMOVE THE ORNAMENT PANEL.

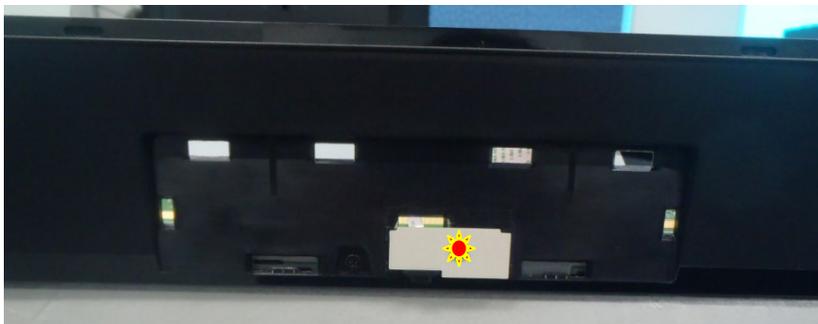

1. Ornament Panel (OP) & Hooks position

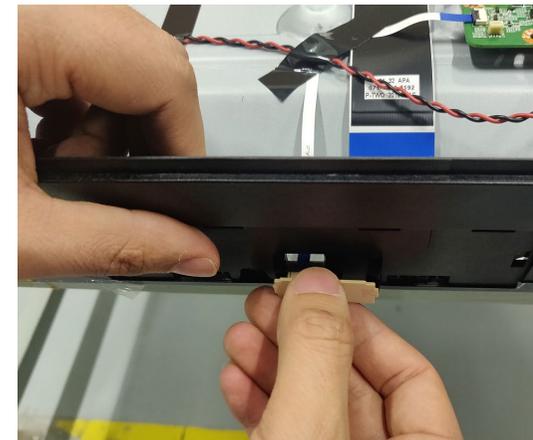

2. Push Hooks to release OP

3. Rotate the OP to release

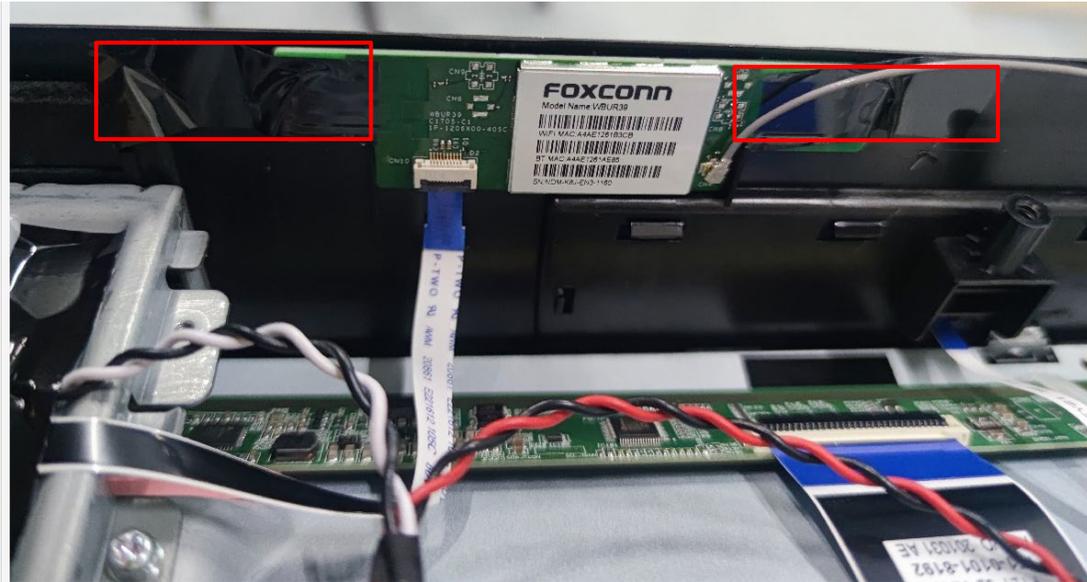

4. Remove the screw  SCREW, F T3X6 1 PCS

5. Remove IR board from bezel and disassemble IR board clip
***When assemble IR board back to Bezel, insert IR FFC firstly**

4). REMOVE the WIFI MODULE

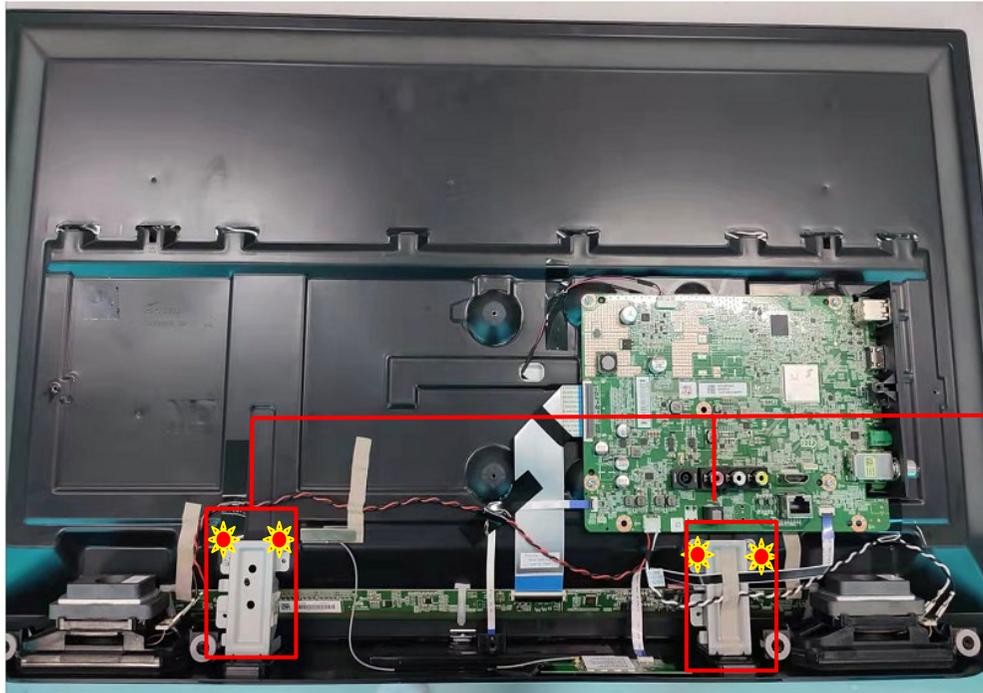

1. Remove tape (2pcs)

2. Take out the WIFI MODULE

5). REMOVE the BOTTOM FRAME

Remove the BOTTOM FRAME

1. Remove the screw  SCREW (+PSW) (M3X6) 4 PCS

2. Remove the 2 PCS FRAME BOTTOM

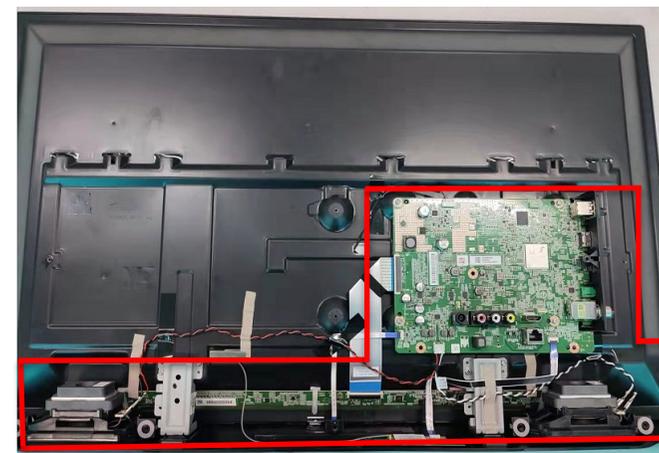

6). TURN THE SET & REMOVE THE TAPE.

1. Flip the TV

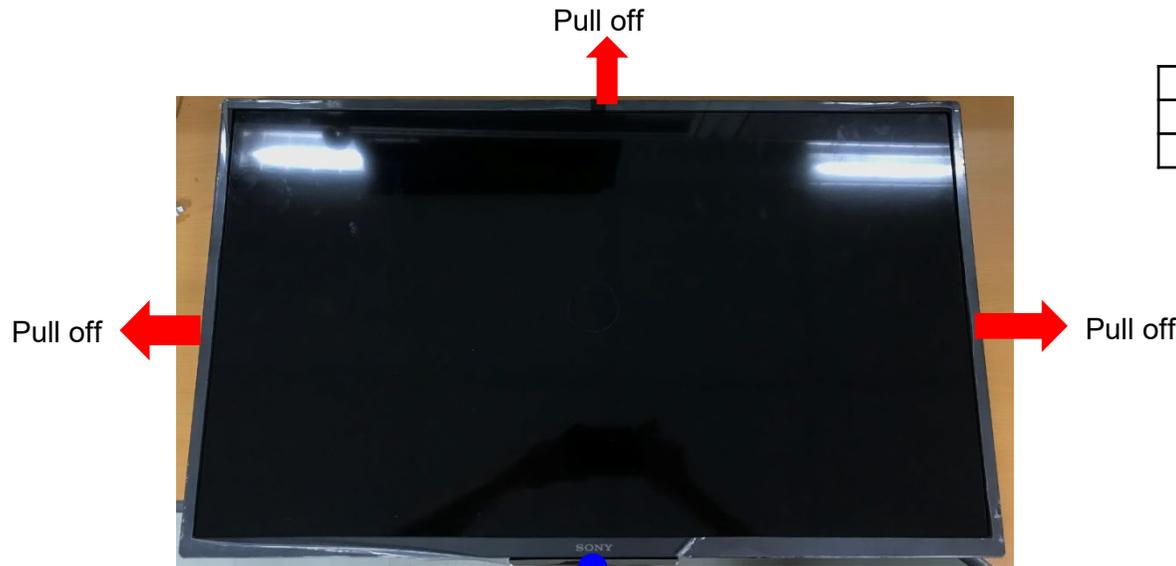

2. Remove the tape

Cushion can't touch this area, the height of cushion must more than 35mm.

7). REMOVE THE BEZEL

	DESCRIPTION	Quantity
⚠	ASSY, BEZEL FRONT	1
●	SCREW M2.5L4	1

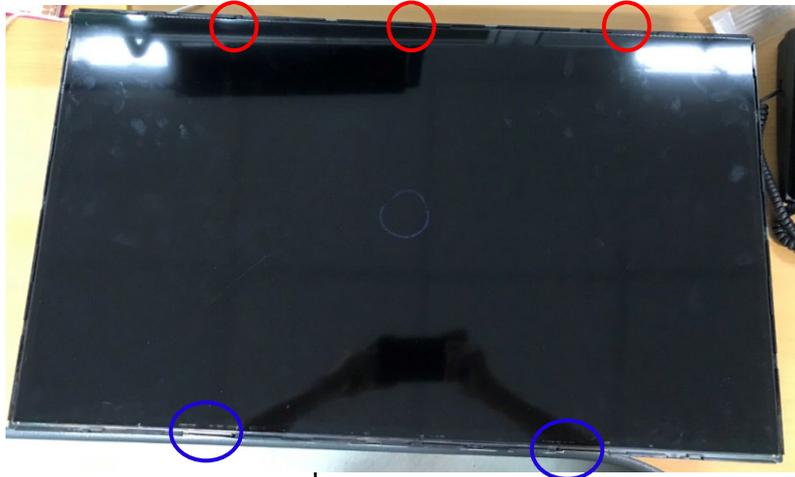

1. Remove the Bezel Screw.
2. Pull off the T/L/R side of Bezel firstly.

3. Take off Bezel top side, then bottom side.

LCM without Bezel

8). TAKE OFF THE O-CELL

	DESCRIPTION	Quantity	REMARK
	LIQUID CRYSTAL ELEMENT(B32WHB)	1	
○	LIGHT COVER TAPE	3	Can not reuse
○	THERMAL TAPE 40X20	2	Can not reuse

1. Take off LIGHT COVER TAPE (3pcs).

2. Take off PWB locker firstly (3 position).

9). TAKE OFF THE MIDDLE CHASSIS

Remove the M/C from the position

External-fixed

Internal-fixed

External-fixed

10). TAKE OFF THE FILM (DIFFUSER SHEET, PRISM SHEET 0, PRISM SHEET 90 , Diffuser plate)

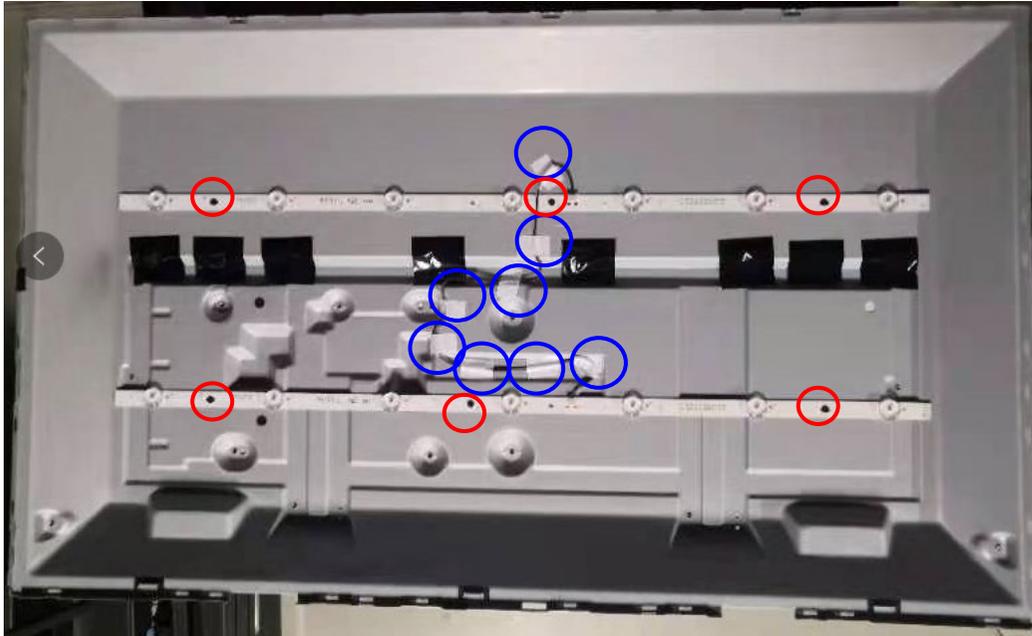

1. Take off the Film(Diffuser Sheet , Prism Sheet 0 , Prism Sheet 90 , Diffuser plate) .

DESCRIPTION	Quantity	REMARK
DIFFUSER SHEET	1	Can not reuse
PRISM SHEET 90	1	Can not reuse
PRISM SHEET 0	1	Can not reuse
DIFFUSER PLATE	1	

11). TAKE OFF THE REFLECTOR SHEET

1. Take off the Reflector Sheet.

DESCRIPTION	Quantity	REMARK
REFLECTOR SHEET	1	

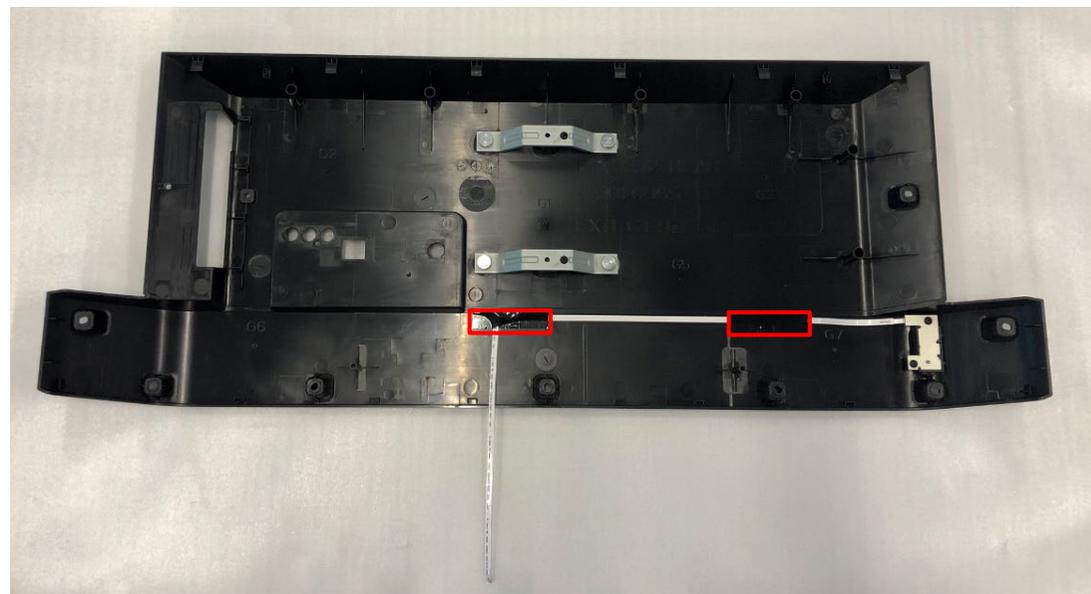

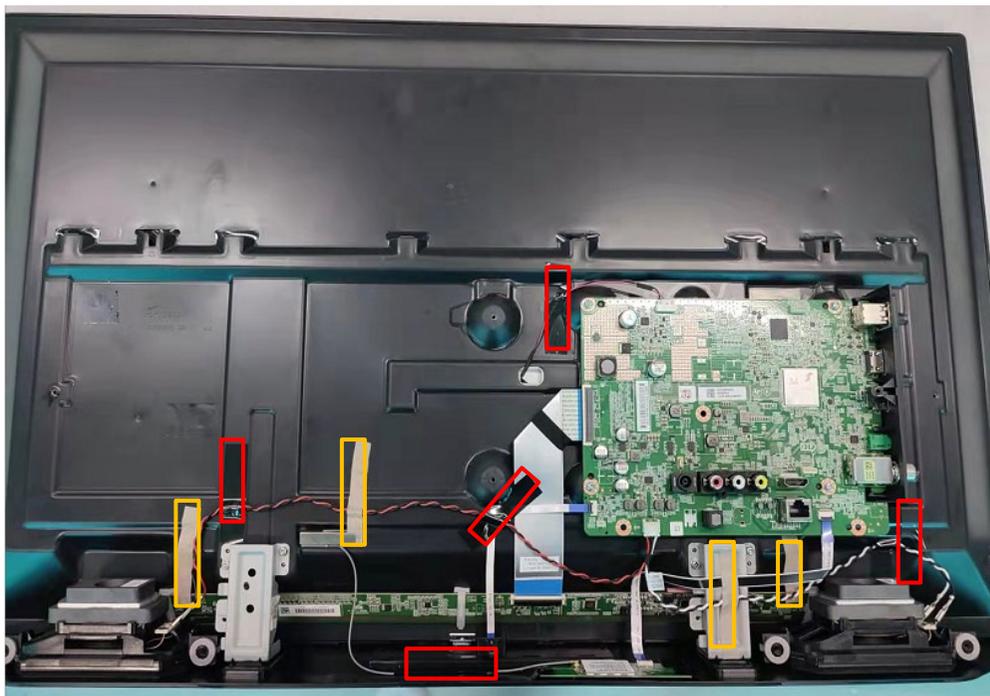

12). TAKE OFF THE LIGHT BAR AND CABLE

1. Remove LB CABLE FIXED TAPE (8pcs).
2. Remove LB SCREW M2.5L1.5 (6pcs).
3. Remove LS BAR, LEXTAR LB3209L.0 (32) (2pcs)

	DESCRIPTION	Quantity	REMARK
○	LS BAR SCREW M2.5*L1.5 /black	6	Can not reuse
○	LB SCREW M2.5L1.5	8	Can not reuse
	LS BAR, LEXTAR LB3209L.0 (32)	2	Can not reuse

1-6. DISASSEMBLY OF LCM AND SERVICE POSITION

1-6-2. KD-55X75K

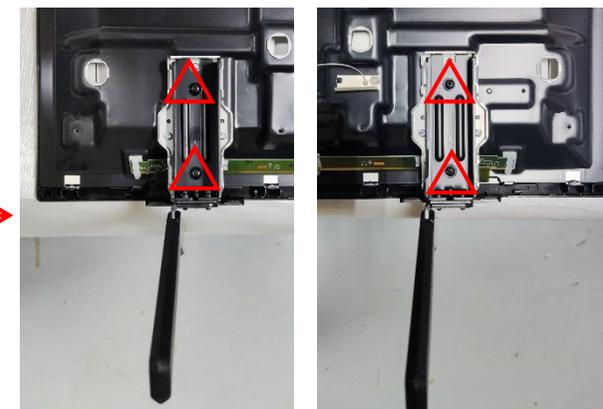

1). REMOVE THE STAND

1. Lay down the set.

2. The Stand screws

△ SCREW, +PSW M4X10 4PCS

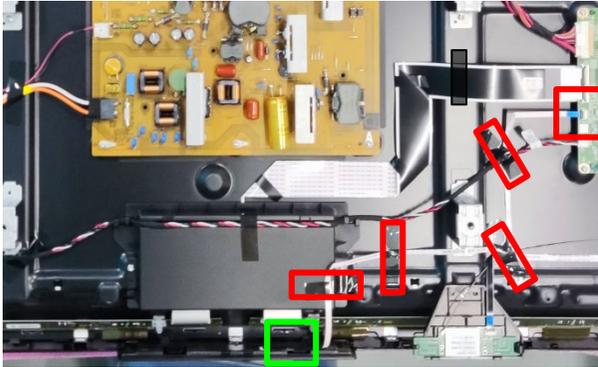

3. Hold the Stand while unscrewing

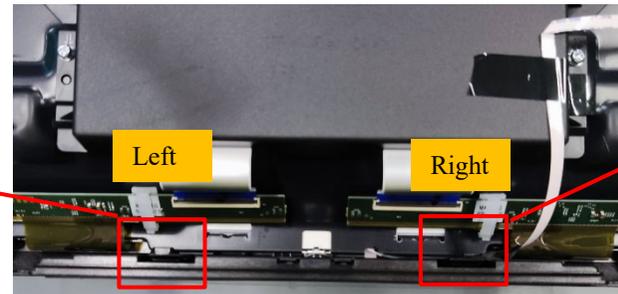

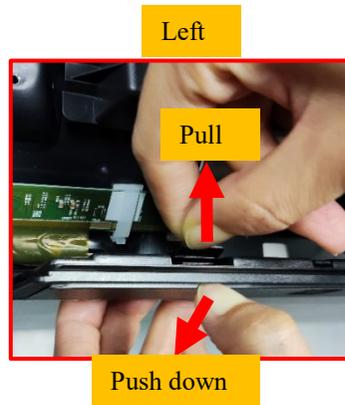

4. Take off the Stand

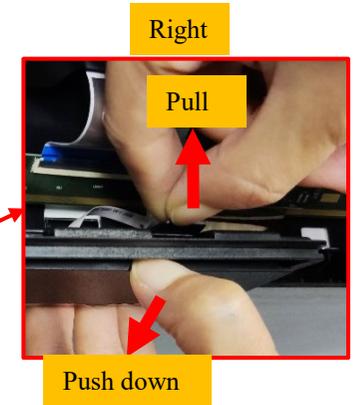

2). REMOVE THE ORNAMENT PANEL.

1. Remove the tape and double side tape and remove the FFC from main board.

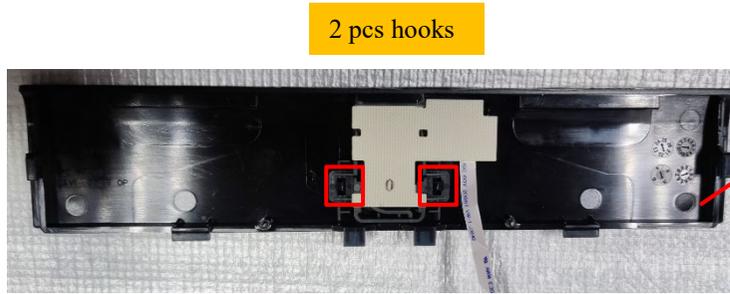

2. Ornament Panel (OP) & Hooks position

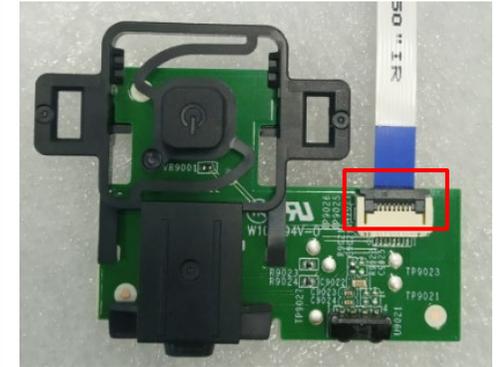

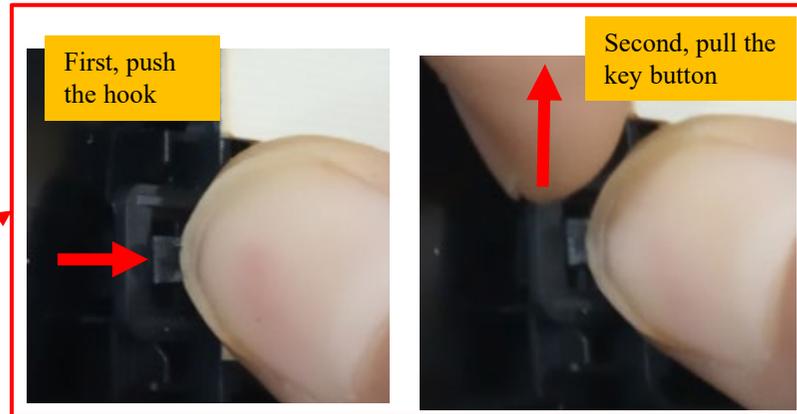

3. Push OP downward to take it out

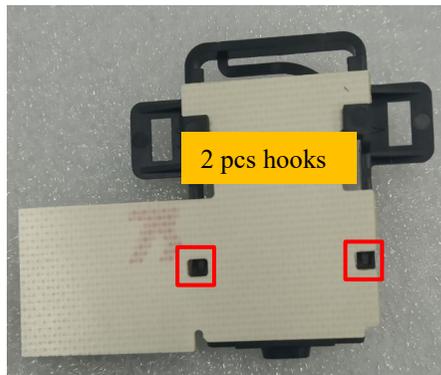

2). REMOVE THE ORNAMENT PANEL.

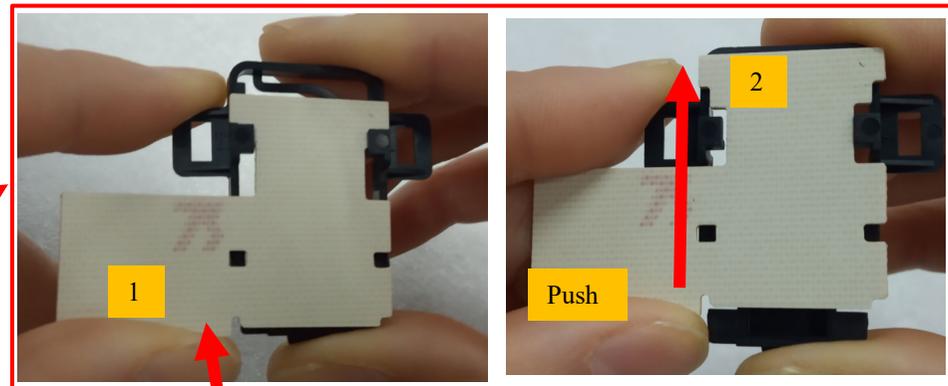

4. Remove the button and IR board assembly from the OP cover

5. Remove the FFC from the IR board.

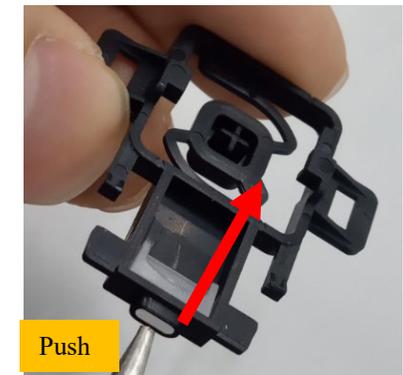

6. Remove the IR board from key button

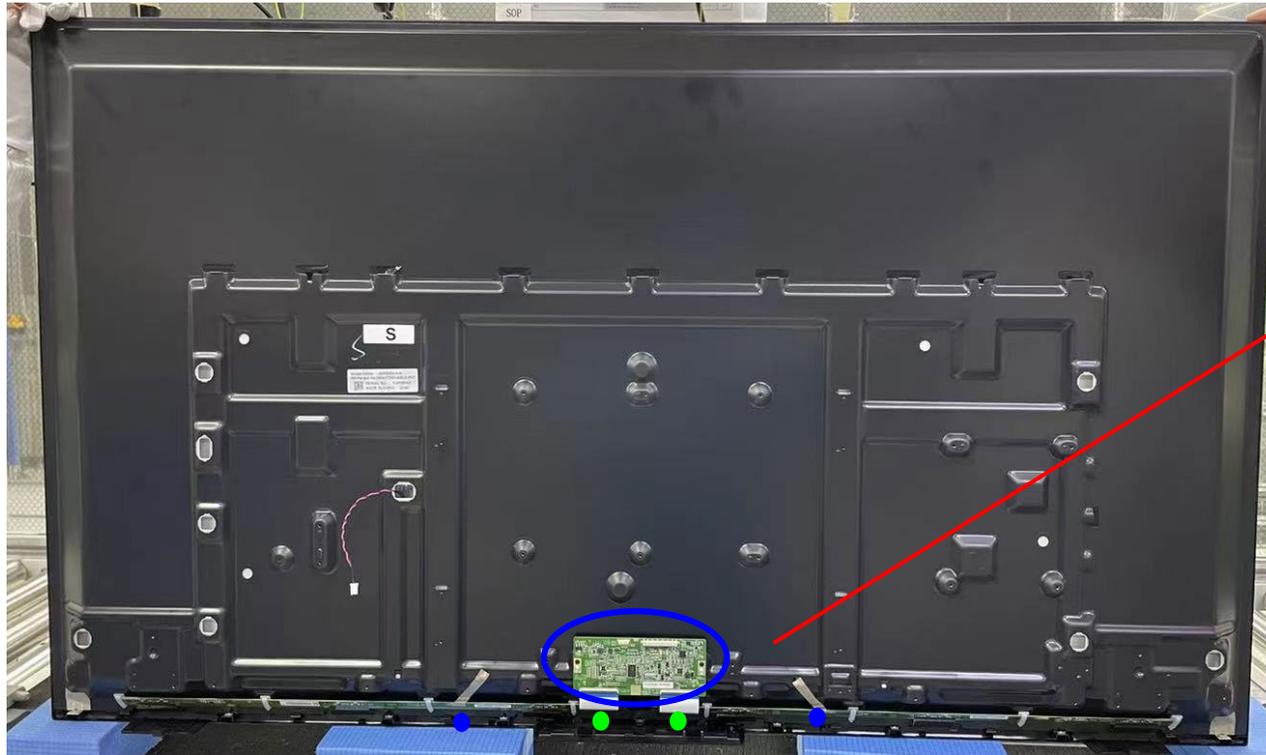

First, lift up IR board to release the hook ,then push forward at the same time to disassemble IR board.

***When assemble IR board back to Bezel, insert FFC firstly**

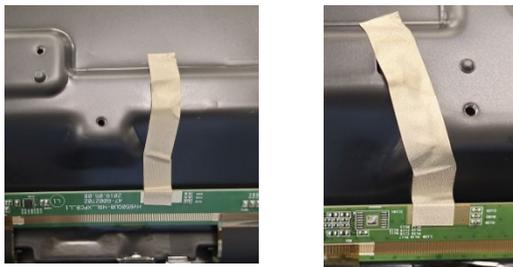

7. Remove the Light Guide from key button

3). REMOVE THE T-CON&T-CON FFC

- 1.Remove the T-CON FFC
LG:60PIN(2pcs)
- 2.Remove the T-CON SCREW M3*L6(2pcs)
- 3.MOUNTED PWB E-T-CON
LG:LC550EQQ-SQA1-T

3.Remove the EMI tape_A (55)(2pcs.)

APPENDIX-2 Software data update

■ SOFTWARE UPDATE BY USB MEMORY

1. Make sure TV already finished boot up and in Home Menu.
2. Insert USB device to TV that contains the new version software.

***Be sure only one OND zip file is directly located under ROOT folder of the USB device.

3. A "System Software Update" page will show up.

***For a success of software update, it will take 10~20 min/time. If older software package version is used, TV will display message "Software is up to date".

4. After complete upgrade, TV will display message "The system software update is complete".
5. Select [OK] to exit and then disconnect USB from TV
6. Remember to check the software version is same as the target version you want to update.

WARNING:

During the firmware installation process, do not remove the USB device, or switch off the TV set or remove the power.
